# SOAR Playbook - Aftermath Collection (AWS S3)

This SOAR playbook is provided to collect the output from an Aftermath Scan and upload it to an AWS S3 bucket.

## About Aftermath

Aftermath is a Swift-based, open-source incident response framework, available on Jamf's open source GitHub repository (<https://github.com/jamf/aftermath>).

Aftermath can be leveraged by defenders in order to collect and subsequently analyze the data from the compromised host. When deploying Aftermath via Jamf Pro, this script can be used in tandem with an Aftermath first run, ensuring the data is securely stored in a designated S3 bucket once an Aftermath collection is complete.

## Workflow Steps

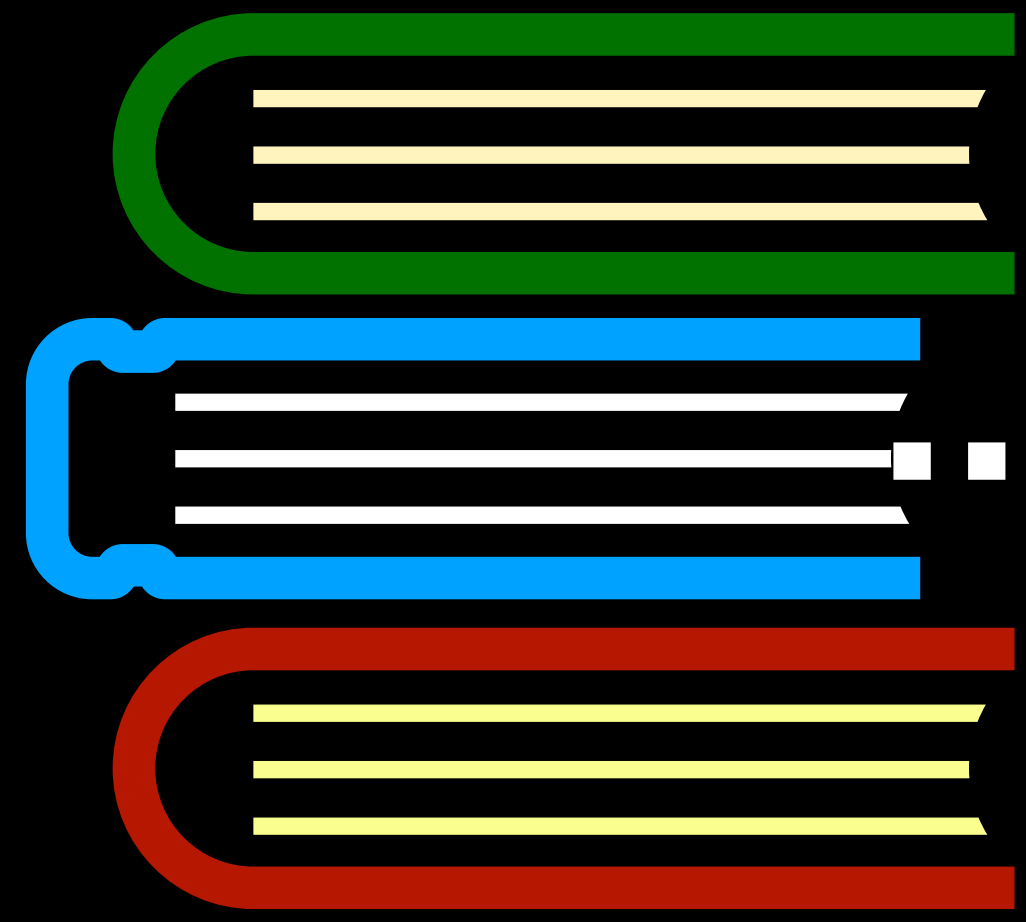

Steps to create the workflow:

- Jamf Pro - Upload [Aftermath.pkg](#) and deploy to endpoints
- Create [aws\\_aftermath.pkg](#) and upload to Jamf Pro
- Jamf Protect - Analytics Smart Group Identifier configured
- Jamf Pro - Create a Smart Group populated by `Jamf Protect - Smart Groups` [Extension Attribute](#)
- Jamf Pro - Upload [aftermath\\_collection.sh](#)
- Jamf Pro - [Create Policies](#)
  - Aftermath Scan
  - Aftermath Collect
  - AWS Aftermath Credentials

# ANALYSIS

Documentation

**i2pd (I2P Daemon) is a full-featured C++ implementation of I2P client**

I2P (Invisible Internet Protocol) is a universal anonymous network layer. All

**ROAD TO v2**

A stylized illustration of a winding road with white dashed lines on a dark background. The road curves from the bottom left towards the top right, creating a sense of depth and movement. The text "ROAD TO v2" is overlaid on the right side of the road.

**ROAD TO v2**

<https://github.com/jamf/aftermath>

MacAdmins: @stuartjash, @benyo

Third Requirement:

This is not specifically mentioned in the policy, but follows the spirit of what Jamf is trying to accomplish with an Open Source Policy. This is a public repository representing Jamf. As such, a well crafted README is required before publishing. I cannot imagine an alien holding a decapitated human head is appropriate to represent Jamf.
